It is recommended to have at least a CCENT or equivalent experience.

Course Description

Summary It's finally here, the new Cisco ISE 2.1 course from Cisco Systems and WiFi Training is one of the first partners authorized to teach this new program. Our course includes many extra's found nowhere else. Full CyberSec (Pentest) Toolkit \$999 value WLAN Troubleshooting toolkit \$999 value This course discusses the Cisco Identity Services Engine, an identity and access control policy platform that provides a single policy plane across the entire organization, combining multiple services, including authentication, authorization, and accounting (AAA), posture, profiling, device on-boarding, and guest management, into a single context-aware identity-based platform. The training provides students with the knowledge and skills to enforce security posture compliance for wired and wireless endpoints as well as enhance infrastructure security using the Cisco ISE. Special Note: Course kits are available in digital format only. The digital version is designed for online use only, not for printing.
