

CCNP Wireless 11 Day Bootcamp

Course Details

Course # CCNPW
Vendor Cisco Systems

Prerequisites

Students must have a valid CCNA Wireless certification in order to successfully complete the CCNP Wireless certification requirements.

This may include

Any CCENT, CCNA, CCNP, or CCIE Track + completing the WIFUND course and exam.

If students do not meet the above requirements, please contact our team so we can help you prepare.

Course Description

Summary The Cisco CCNP Wireless bootcamp is for IT Professionals, Network Engineers, Administrators, and team leads who specialize in Enterprise Wireless Network solutions. This course covers the same material learned WIDESIGN, WISECURE, WIDEPLOY, and WITSHOOT in just 11 days vs the 18 days required when taking the courses separately. This course will be taught by awarded Cisco Expert Instructors (CCIEW/CWNE). ** Cisco Learning Credits are Accepted for this course **

CCNP Wireless v3 - 11 Day Bootcamp by WiFi Training

Are you ready to become a CCNP Specializing in Wireless (CCNP Wireless)? There has never been a better time to learn wireless, or a better company to train with. WiFi Training has the largest wireless expert instructor bench in the world. Many of our instructors are authors and co-authors of official training, and are awarded for continuously providing outstanding training.

We developed this 11 day CCNP Wireless bootcamp for students who have experience with Cisco wireless solutions, but may not have the time or budget to attend 4 courses, over 18 days of training. We cover the same 4 courses across 11 days of training but the days do run longer than a normal 9-5 course. One of the great things about this program is you can attend the full 11 days at once, or if you need flexibility we offer the ability to split up the two weeks.

Week 1 is a 6 day covering WIDESIGN/WISECURE, students receive full student kits and labs for both courses.

Week 2 is a 5 day course covering WIDEPLOY/WITSHOOT, students receive the full student kit and labs for both courses.

For more information or to enroll, please contact a training advisor through this [form](#) or choose enroll now to sign up.

**** Cisco Learning Credits are accepted for this course ****

Prerequisite – CCENT or CCNA + CCNA Wireless

This course covers the same material in all four courses required to earn a CCNP Wireless certification.
