

Rockstar Wireless Networking

Course Details

Course # RWN
Vendor WiFi Training

Prerequisites

Course Description

Summary At the end of 2014 WiFi became the #1 network access method in the world. This trend has been continuing to grow at exponential rates, yet the wireless engineering talent in the market today remains relatively small compared to other technologies. Rockstar Wireless Networking was designed for everyone in IT to learn the fundamentals of Wireless networking.

Whether you are in sales, service, management, or engineering you are sure to develop new skill sets in this course. If IT Certification is your goal, this course comes complete with a certification of its own and provides an excellent foundation for other vendor certifications such as CCNA Wireless, or CWNA.

This course is designed for

- Anyone in IT
- IT Account Managers
- Technicians
- Managers

- Network Administrators
- Network Professionals

This course provides a great reference for experts from other technology area's that are new to WiFi as well.

Prerequisites:

- WiFi Training's – Network Basics Bootcamp
- CompTIA A+ / N+ or CCENT is recommended but not required
- Understanding of OSI and TCP/IP Models
