

# CCNP Security - 11 Day Boot Camp

---

## Course Details

**Course #** CCNPS  
**Vendor** Cisco Systems

## Prerequisites

Students who plan to earn a CCNP Security certification must have an active CCNA Security certification. This may include

CCENT + IINS = CCNA Security

CCNAX + IINS = CCNA Security

NOTE: Any CCIE's can take and complete professional level training without requiring the associate level certifications. For example, a CCIE R/S, can serve as a prerequisite for CCNP Security.

## Course Description

**Summary** The Cisco CCNP Security Boot Camp is an accelerated 11 day program covering all four CCNP Security courses (SISAS, SIMOS, SITCS, SENSS) in just 11 days. This course is designed to maximize students time and training investment by condensing 20 day's worth of training into just 11 days. Students receive full authorized course ware for all four courses including SISAS, SIMOS, SITCS, SENSS with this program, and access to authorized labs for all four courses.

The Cisco CCNP Security Boot Camp is an accelerated 11 day program covering all four CCNP Security courses (SISAS, SIMOS, SITCS, SENSS) in just 11 days. This course is designed to maximize students time and training investment by condensing 20 day's worth of training into just 11 days. Students receive full authorized course ware for all four courses including SISAS, SIMOS, SITCS, SENSS with this program, and access to authorized labs for all four courses.

This course is only delivered by authorized, tenured, Cisco Expert Instructors who specialize in security and can teach these topics at this accelerated pace. In short expect a life/career changing experience found nowhere else.

NOTE: Students should expect 10-12hr day's in this program, as they are common. Instructors may assign pre-study lessons to optimize the classroom experience and time.
