

Implementing and Configuring Cisco Identity Services Engine (SISE) v3.0

Course Details

Course # SISE3
Vendor Cisco Systems

Prerequisites

The knowledge and skills that a learner should have before attending this course are as follows:

- Familiarity with Cisco IOS CLI
- Familiarity with Cisco ASA
- Familiarity with Cisco VPN clients
- Familiarity with Microsoft Windows Operating Systems
- Familiarity with 802.1x

Course Description

Summary Implementing and Configuring Cisco Identity Services Engine (SISE) v3.0 is a 5-day Cisco ISE training program that discusses the Cisco Identity Services Engine, an identity and access control policy platform that provides a single policy plane across the entire organization, combining multiple services, including authentication, authorization, and

accounting (AAA), posture, profiling, device onboarding, and guest management, into a single context-aware identity-based platform. This CCNA course provides students with the knowledge and skills to enforce security posture compliance for wired and wireless endpoints as well as enhance infrastructure security using the Cisco ISE. Nobody delivers this course like WiFi Training and our network of partners. WiFi Training owns our own SISE labs, and offers rack rentals to other authorized Cisco partners for this course. Our datacenter is located in Central Texas, and we have a proprietary lab ops management system which allows you remote access with no software to install, or VPN's to connect to. Every instructor we have who delivers this course has done countless ISE deployments in the field before being allowed to teach the subject matter to students. Our team members were some of the first to deploy ISE 2.3/2.4 into production, and integrate with Stealthwatch, and Cisco DNA. We go beyond the standard material, with real-world lessons, insight and shared experiences not often seen anywhere. Want to know Secure way's to handle thousands of guest? Want to know the easiest way to onboard thousands of new devices via API calls? Our team has that experience, and it's not found in the typical course. WiFi Training believes the right instructor can be life changing as well as provide a massive ROI for our clients. Want to ensure this is the best course for your business? Call and speak directly with one of our expert instructors ahead of time.

Nobody delivers this course like WiFi Training and our network of partners. WiFi Training owns our own SISE labs, and offers rack rentals to other authorized Cisco partners for this course. Our datacenter is located in Central Texas, with easy connection options to labs. Every instructor we have who delivers this course has done countless ISE deployments in the field before being allowed to teach the subject matter to students. Our team members were some of the first to deploy ISE 2.3/2.4 into production, and integrate with Stealthwatch, and Cisco DNA.

With this course students receive

- Authorized Cisco Course Kits
- Awarded Cisco Expert Instructors
- High Performance SISE Labs, located in the US (Texas)
- BONUS LAB Challenges (Found nowhere else)

- 60 Day's access to course recordings
- WiFi Training student kit

WiFi Training believes the right instructor can be life changing as well as provide a massive ROI for our clients. Want to ensure this is the best course for your business? Call and speak directly with one of our expert instructors ahead of time.

The primary audience for this course is as follows:

- ISE Administrators / Engineers
- Wireless Administrators / Engineers
- Consulting Systems Engineers
- Technical / Wireless / BYOD / Security Solutions Architects
- ATP partner systems and field engineers
- Systems integrators who install and implement the Cisco Identity Service Engine v2 x

The primary audience for this course is as follows:

- ISE Administrators / Engineers
