Computing 101

Course Details

Course #   Computing101
Vendor   WiFi Training

Prerequisites
None

Course Description

Summary   Computing 101 is a new micro course from WiFi Training designed to help students who are new to IT learn about the building blocks of modern personal computers. This course is one you can give to any skill level to have them understand what's going on inside the box by there desk. Sometimes we assume people have a certain skillset just because we believe something is easy after all everything is easy when you know-how. This 1hr micro-course is easy to digest for anyone and will help them understand more about what type of computer they should get, more about accessories and peripherals, students will be able to identify upgradeable components to computers and understand some common PC security best practices all users should know.
