

# Cisco 9800 Lessons

---

## Course Details

**Course #** C9800WT  
**Vendor** WiFi Training

## Prerequisites

It is recommended students have at least a CCNA + CCNA Wireless, CWNA, or equivalent level of experience.

## Course Description

**Summary** Are you looking at rolling out the Cisco 9800s soon? Maybe you have them ordered and heard from the great vine there are big changes with the new platform? Maybe you just want to keep current with the latest Cisco Wireless technologies. Maybe you just love keeping your skills sharp and staying ahead of the pack with new courses from WiFi Training. Whatever the case, there are SUBSTANTIAL differences between the way you built Enterprise WLANs before, and the way you will build them moving forward on the C9800 product line.

The **Cisco 9800 Lessons** course from WiFi Training is a new digital course designed to help students learn what's new with Cisco's flagship Wireless Controller product line the 9800s. The course is designed for IT professionals with at least an associate-level knowledge of Wi-Fi operation to gain critical skills on Cisco 9800 series controllers.

Almost all Cisco Wireless technicians and professionals have spent their career working with AireOS based WLAN controllers and even as new technologies and PHY's roll out configuring WLAN's for the enterprise has been performed largely the same way for more than a decade. The 9800 series product line is now all IOS-XE based with a new GUI, new methods for creating and deploying WLANs that may

be foreign to a lot of WLAN Pros. Students can take this course to spin up quickly on the C9800's and learn critical skills like learning the new GUI, creating WLANs, Policies, and Tags for proper traffic flow, perform software upgrades, configure high availability, and enable enterprise WLAN security features and segmentation.
