

Understanding Cisco Wireless Foundations (WLFNDU) v1.0

Course Details

Course # WLFNDU
Vendor Cisco Systems

Prerequisites

- General knowledge of networks
- General knowledge of wireless networks
- Routing and switching knowledge

Course Description

Summary WiFi Training is the undisputed leader in Authorized Cisco Wireless Training. Every Authorized Cisco Wireless course we teach is led by well-known Cisco Expert Instructors (CCIE/CWNE), and this course is no exception. We all take courses to set ourselves and the companies we work for a part in the industry, and WiFi Training will keep you ahead of the pack. The Understanding Cisco Wireless Foundations (WLFNDU) v1.0 course gives you the knowledge and skills you need to position, plan, implement, operate, and manage a Cisco® wireless LAN (WLAN) network. This course teaches you how to design, install, configure, monitor, and conduct basic troubleshooting tasks on a Cisco WLAN network of any size.
